**POWER CHEMICAL CORPORATION**, a Korean-owned corporation, located in Jiangsu, China. Since its foundation, we have focused on manufacturing silicone materials, which including silane coupling agents, silane crosslinkers, silane blocking agents, silicone rubber and silicone building protection materials.

Our corporation is rapidly developed at an annual growth rate of over 30% in successive years. We have six factories, which produce over 100 kinds of standard commercial organosilanes and over 300 kinds of special organosilanes. Now our annual production capacity is over 30000 MT. In addition we have a factory specialized in producing rubber chemicals. SiSiB<sup>®</sup> is a registered trademark of Power Chemical Corporation (PCC), now SiSiB<sup>®</sup> is one of the most famous brands in the worldwide. Our products have been marketed across Europe, America and Asia Pacific, totally over eighty countries. Total sales turnover exceeded USD 80 million in 2007.

#### Research and Development

We think R&D as the key to our technology leadership and future markets. Almost five percent of our sales revenue are being spent on R&D. We also cooperated with several famous industrial universities, like Nanjing University of Chemical Technology, to promote our technology and process continuous innovation. Organosilane is the major focus of our research activities. SiSiB<sup>®</sup> Standard Silanes are widely used as adhesion promoters (coupling agents) between inorganic materials and organic polymers, crosslinkers (crosslinking agents) and surface modifiers in adhesives, coatings, glass fibers, filler treatment, foundry, polymer modification, printing inks, rubber and elastomers, sealants, textiles, thermoplastics fields. SiSiB<sup>®</sup> Special Silanes are mainly used as silylating agents, blocking agents in organic synthesis of pharmaceuticals.

#### Quality Control

We consider quality control extremely important as a featured producer to provide stable and high-quality products. All of our plants have been certified by ISO9001. Over 80 senior technicians and engineers worked in our factories; we possess perfect production facilities, precise testing equipment and large-scale laboratories, which guaranteed our high quality products' consistency. We will continue to improve quality control levels to meet the high-level demands of our customers; also we will promote every employee's consciousness about product quality.

#### Environment and Safety

We usually places the highest priority on its policy of "safety and environmental protection first" in all of our activities. Accordingly, we have adopted many powerful environmental objectives. To protect our environment, we not only try our best to economize our energy and material resources, but also continuously improving our process to ensure to meet legal requirements. Most of our plants have been certified by ISO14001, and we are trying for others.

### **QUALITY & LOWER PRICE IS OUR COMMITMENT**
